

BOAT DAY

First Mate Checklist

Does everyone on board have a life jacket that fits?
Help your shipmates put their life jackets on properly!

Locate the fire extinguishers, emergency flares,
throwable and first aid kit on the boat.
Make sure everyone else knows where they are located!

Double check that your navigation lights and horn work
before leaving the dock.

Check the bilge pump. Make sure it's working properly
and isn't filled with water.

Check the gas gauge and let your captain know how
much fuel you have.

Review the weather! You don't want to head out on the
water if it looks like it's going to storm. Do you have a
weather app downloaded on your phone?

Make sure you have plenty of drinking water and
sunscreen on board.

Ask your captain about the safest way out of the marina
and help in using a compass/GPS to set the course.

Last thing to check:
Is everyone ready to have FUN and MAKE MEMORIES?
